

# CREW TRACKER SOFTWARE

It's 1AM...Do you know where your crews are?

You will with CrewTracker Software!

**REAL-TIME** data collection and reporting

**On Demand** service data accessible on Internet

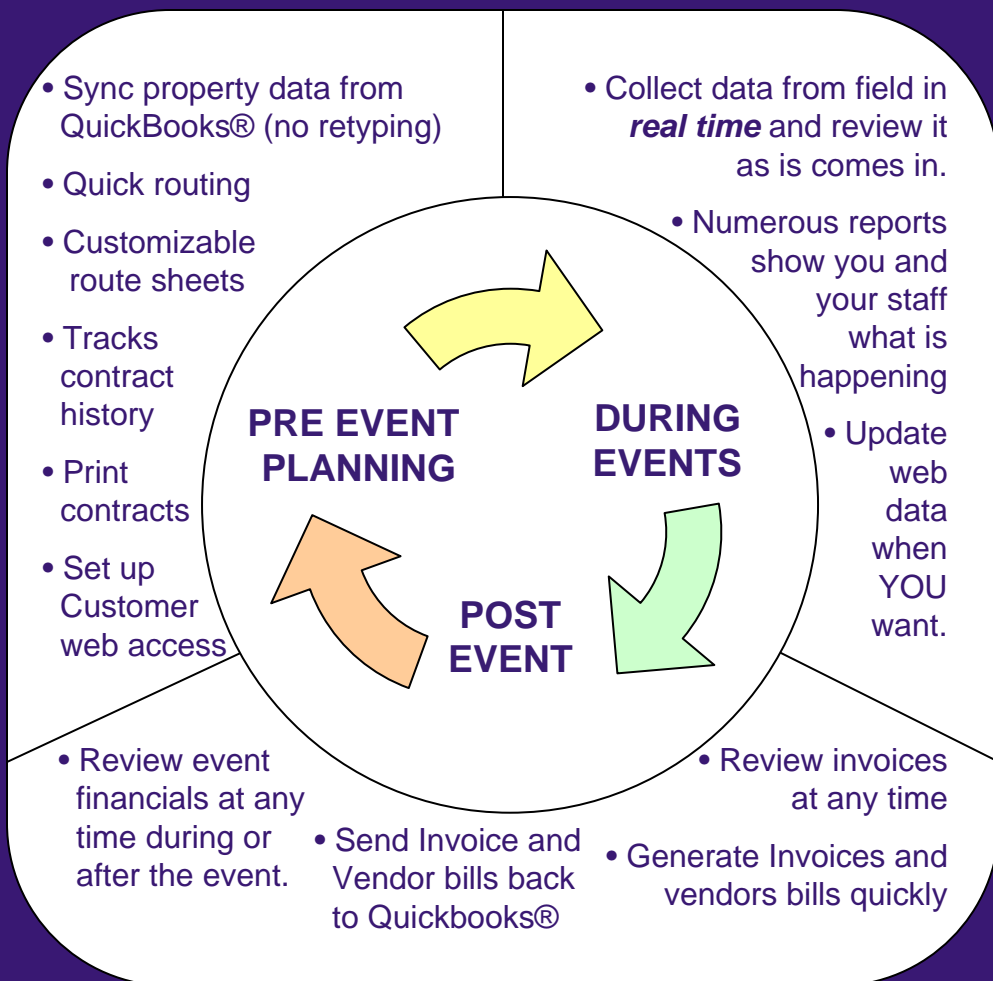

**Immediate** invoicing and vendor billing

# Covers all aspects of your Business Cycle

*“Over the years we have looked for a better way to manage our resources during a winter storm event. The CrewTracker Software proved to be an asset during storm events; we were able to assess our service response and manage the weather conditions in real time. The coordinated software of CrewTracker allows expedited invoicing to our customers and payment to our service providers. CrewTracker allowed our company access and reporting of data to better and more efficiently manage during winter weather. The software was an excellent investment!!!”*

**BSR Services, Inc.  
St. Louis, MO**

## Want to streamline your business?

Look no further! With CrewTracker Software you'll be able to continue to use Quickbooks® and easily add our software to your business. CrewTracker can then start adding value by keeping all of your crew and property information in one place. When a customer calls with a question you'll quickly have all their information at your fingertips.

The Web updates can keep your customers posted on progress about their properties without calling you. Even your field people will know what's going on in the field! No more lost crews!

We include a 3-day workshop to get you up and running FAST! This workshop will take you through the initial steps of configuring options, through entering service information, crews, and routing. Then we'll show you how to collect the real time data and how to manage during an event. Finally we'll show you how to create invoices and bills.

We'll even provide 24/7 quick response support during your first event!

### Minimum System Requirements (per machine)

- 1.5 ghz Intel Pentium® processor or higher
